Waterloo, ON

Software Developer with 2+ years of experience building web and mobile applications using JavaScript, TypeScript, React, React Native, and Node.js. Experienced in building REST APIs, implementing digital identity workflows, and delivering cross-platform features. Skilled in using AI productivity tools for development, debugging, and documentation, with independent review and validation.

EXPERIENCE

Full Stack Software Developer

Dec 2023 – Apr 2026

One37 Solutions, Inc · Canada

- **Replaced manual demo workflows** by building an internal web platform for authoring script-based demos using React, JavaScript, Node.js, and Express.
- **Modernized and modularized the mobile application** by building reusable components, completing React Native and Expo upgrades, and resolving iOS/Android compatibility issues.
- **Enabled secure digital identity sharing and verification** with credential, consent, proof, and identity management workflows.
- **Improved the mobile user experience based on user feedback** by refining UI, navigation, and application workflows.
- **Resolved complex integration issues** across backend APIs, third-party SDKs, WebSockets, push notifications, and mobile platforms.
- **Strengthened release validation** by debugging cross-device regressions and validating builds through TestFlight and Firebase App Distribution.
- **Used AI productivity tools to streamline development workflows** for code generation, prototyping, debugging, and documentation while independently reviewing and validating generated output.

Software Developer Intern

Jan 2023 – Dec 2023

Diaryz · Canada

- **Developed mobile application features** using React Native and JavaScript, including reusable UI components, navigation flows, and API integrations.

TECHNICAL SKILLS
